Professional Profile

Backend Developer with 15+ years of experience designing and delivering backend platforms, APIs, and distributed systems. Brings technical leadership, architectural thinking, and hands-on execution within engineering teams.

Technical Leadership and Impact

- Led an 8-person backend team through mentoring, technical reviews, prioritization, and delivery follow-up.
- Designed and evolved distributed accounting systems covering parametrization, reports, balances, journal entries, and data processes.
- Modernized services and pipelines through migrations from monoliths, Serverless, and legacy versions to event-driven architectures and AWS CDK/CDKless.
- Implemented resilient flows with Kafka, SNS/SQS, idempotency, retries, backoff, reprocessing, and out-of-order event handling.
- Improved observability and operational support with alerts, logs, CloudWatch, and recovery tooling.

Technical Skills

Backend: PHP, Laravel, Python, FastAPI, Django, Node.js, TypeScript, Express.	Architecture: Microservices, hexagonal architecture, DDD, REST APIs, SOLID, Clean Code.
Cloud: AWS Lambda, API Gateway, CDK/CDKless, CloudFormation, CloudWatch, SQS, SNS, S3, DynamoDB.	Data and messaging: MySQL, PostgreSQL, MongoDB, ClickHouse, Redis, Kafka, RabbitMQ, ETL.
Reliability: Idempotency, retries, backoff, reprocessing, feature flags, observability.	Delivery: PHPUnit, Jest, unit and integration testing, CI/CD, Docker, Git, Scrum, technical mentoring.

Selected Projects

- Distributed accounting platforms:** accounting parametrization, API and data migrations, event processing, reporting, and AWS-based operational support.
- Modernization and architecture:** PHP/Python microservices, REST APIs, asynchronous messaging, cloud infrastructure, historical data loads, logical deletion, and idempotency.
- AI agents and automation:** public multi-agent orchestration toolkit with specialized teams, shared skills, delivery, review, QA, security, maintenance, and hotfix commands, plus adapters for multiple developer tools.
- Engineering foundations:** public projects involving DDD, Clean Code, SOLID, PHPUnit/Jest, CI/CD, Spring Boot, Keycloak, and Vue.

Professional Experience

Backend Developer | Alegra, Remote

Mar 2024 - Present

- Developed backend services within an accounting platforms team for distributed accounting systems and accounting parametrization.
- Contributed to the migration between versions of an accounting platform, including historical data loads, reconciliation, and logical deletion.
- Implemented asynchronous flows with messaging and analytical and relational databases to validate, reconcile, and publish accounting events.
- Built batch and individual reprocessing endpoints through protected API Gateway routes.

- Improved reliability through idempotency, out-of-order event handling, controlled retry policies, and cloud observability.

Nov 2022 - Present

Backend Development Lead | Vixi Dev, Cancun, Mexico

- Led an 8-person backend team, including mentoring, technical reviews, and delivery follow-up.
- Built Laravel 8 and PHP 8.1 backends for cryptocurrency exchange and P2P platforms.
- Integrated Fireblocks, Binance Exchange, DHL, Alquimia, Paycaddy, and Samsub for payments, logistics, KYT, and KYC processes.
- Implemented workers, queues, real-time notifications with Pusher, and a Laravel OAuth2.0 identity provider.

May 2022 - Nov 2022

Backend Developer | T2MC Vahala Partners, Madrid, Spain

- Built algorithmic trading platforms with Django and FastAPI on Python, WebSockets, Stripe, Kraken Exchange, and MetaTrader 4.

Jan 2022 - May 2022

Software Engineer | ALIMATIC, Havana, Cuba

- Developed web applications with PHP, Laravel 7, and Vue.js.

Jan 2019 - Dec 2021

Software Engineer | Grupo Empresarial MINSAP, Havana, Cuba

- Developed software and IT infrastructure for enterprise information workflows.

Education and Languages

BSc in Computer Engineering, Universidad Tecnologica de La Habana, 2014-2020. Thesis: microservices infrastructure for Cuban entities using Spring Cloud, Spring Boot, and Keycloak Server.

Languages: Spanish (native), English (intermediate technical and professional communication).
